## CCTV Camera components

We sell well designed CCTV Camera system components such as CCTV cameras. We stock both indoor and outdoor cameras. And also have both network (connected to DVR) and IP (connected to WIFI network).

Our IP cameras can also be configured to work autonomously and to be powered by solar power. In such a configuration they are ideal for monitoring unmanned locations and can be installed on farms, yards, etc.

Such systems are site and use specific and we will be glad to quote for the same should you be interested.
